Certified Products List

ACMI
The Art and Creative Materials Institute, Inc.
Certifying Safety Since 1940

Products Authorized to Bear the Seals of The Certification Program of the Art & Creative Materials Institute

Since 1940, The Art and Creative Materials Institute, Inc (ACMI) has been evaluating and certifying art, craft and other creative materials to ensure that they are properly labeled. This certification program is reviewed by ACMI's Toxicological Advisory Board. There are two Seals that identify ACMI-certified products. The AP (Approved Product) Seal and the CL (Cautionary Labeling) Seal identifies products that require labeling for safe use. Below are detailed descriptions of these Seals.

The AP (Approved Product) Seal:

This Seal identifies art materials that are safe when used as intended and that are certified in a toxicological evaluation conducted by a board certified toxicologist that they contain no materials in sufficient quantities to be toxic or injurious to humans, including children, or to cause acute or chronic health problems. Such products are certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236, the Federal Hazardous Substances Act (FHSA) and the federal Labeling of Hazardous Art Materials Act (LHAMA).

The CL (Cautionary Labeling) Seal:

This Seal identifies products that are certified to be properly labeled for any known health risks and with information on the safe and proper use of these materials. These products are also certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236, the FHSA and LHAMA. Products with this seal are not hazardous if used correctly. It is important to read the product label in full before opening a product that has the CL Seal. These products should never be given to children in grade 6 or lower, or anyone who for any reason is unable to read, understand or implement safety labeling and instructions.

Important Note: This list is automatically updated based on the current products in the ACMI system. This list may change without notice. Reproduction of this list in its entirety or in part is permissible provided that the wording and information contained in this list be reproduced exactly as it appears in the complete list or in any excerpt of the list. Under NO circumstances may any of the wording or information in this listing be changed, without the express written consent of The Art and Creative Materials Institute, Inc.
